

ANKITA MANNA

B. Tech. Computer Science Engineering
Specialization: Artificial Intelligence

Contact No. 9433945463
Email: ankitamanna2003@gmail.com

Examination	University / Board	Institute	Year	CGPA
Graduation	Jamia Hamdard University	Jamia Hamdard University	2025	7.8
Intermediate	CBSE	Kendriya Vidyalaya	2021	8.5
Matriculation	CBSE	Kendriya Vidyalaya	2019	9.1

TECHNICAL SKILLS

Programming Language: Python, C, CSS, C++, JAVA, HTML, JavaScript

Databases: MySQL, MongoDB

Web app Frameworks & Libraries: React, Node.js, Express.js, Flask

Designing software: Adobe photoshop, Canva

EXPERIENCE

Machine Learning engineer | Intern | IIT – Delhi

Dec 2024 - Jun 2025

- Worked with Big Data for Analysis & Cleaning
- Built Advanced Machine Learning Models and Deep learning models – Time Series Forecasting models.
- Developed and worked with several automation model for web scraping

Jr. Python Developer | Intern | Excellence Technologies Pvt. Ltd.

Jun 2025 - Present

- Developed an AI-powered Flask backend with resume parsing, JWT auth, and multi-role support using MySQL and REST APIs.
- Built intelligent job-candidate matching, scoring, and interview generation using sentence-transformers, ChromaDB/FAISS, and OpenRouter APIs and React frontend.

TECHNICAL PROJECTS

Bachelor's Thesis | AI - Financial Assistant & Stock Analyzer

Apr - 2025

Guide: Dr. Md. Tabrez Nafis, SEST Jamia Hamdard

- Built a full-stack AI finance chatbot using Flask, Gemini LLM, LangChain, and yFinance for real-time guidance.
- Integrated an LSTM-based deep learning model to predict future stock prices with chart visualization.
- Implemented real-time financial news scraping from multiple sources and article summarization using LLMs.
- Designed a modern dual-panel web interface using HTML, CSS, and JS for interactive chat and stock forecasting.

Car price prediction using linear regression in machine learning

Nov - 2024

Supervised learning project | Guide: Dr. Md. Tabrez Nafis, SEST Jamia Hamdard

- Preprocessed data by handling missing values, encoding categorical variables, and scaling numerical features.
- Model was trained using scikit – learn. A linear regression model was used.

Hotel recommendation system

May - 2024

Supervised learning project | Guide: Dr. Md. Tabrez Nafis, SEST Jamia Hamdard

- Model used – Rule-Based Filtering, NLP, Sorting and Ranking
- User queries are tokenized and preprocessed using NLTK, A set-based similarity approach (word intersection) is used.
- For feature-based recommendations, hotels are ranked based on cosine similarity-like scoring.

RESEARCH PROJECTS

Multidirectional imputation technique Model for filling gaps

Jan - 2024

- Built an AI-powered imputation pipeline using TCNs and LSTM-based autoencoders for time-series data imputation, improving the reliability of missing data reconstruction.
- Applied advanced preprocessing (Z-score normalization, resampling, cyclical features) to improve model performance.
- Optimized large-scale data handling with GPU acceleration. Automated missing data reconstruction.

CERTIFICATIONS

Data Analytics with Python | IIT Roorkee

May - 2025

National Programme on Technology Enhanced Learning (NPTEL) – Passed with certification

Introduction to Database Systems | IIT Madras

May - 2025

National Programme on Technology Enhanced Learning (NPTEL) – Passed with certification

COURSES UNDERTAKEN

- Machine Learning & Artificial Intelligence – TensorFlow, Neural Networks, Machine Learning with Python, Deep Learning Algorithms
- Object-Oriented Programming – (C, C++, Python), Data Structures and Algorithms
- Data Science & Analytics – Data Mining, Data analytics & Algorithms, Data Visualization
- Computer Science Fundamentals – Internet of Things (IoT), Computer Networks
